

Here are the merchant locations where you can make purchases and receive Basic or Increased cashback from MONIX.

To receive Increased cashback, it is important that the purchase is made at a merchant from this list and that the terminal's MCC code matches the one specified in the list.

Please note: sometimes a merchant may have an incorrectly configured MCC code. In such cases, the Bank cannot influence the code set by the merchant.

If you notice an error in the purchase category, simply let us know via the MONIX mobile app by using the "Fix category" option in the transaction feed.

We will review everything and help you.
